

Preface

Science today is an international business, of course, and there has hardly ever been a partition wall between the logical work in Poland and Germany. However, apart from long lasting personal scientific contacts there are good reasons to further intensify the relations between the German and the Polish Community of Logic and Logical Philosophy. So it was only natural to think about bringing them together at a scientific event in a friendly environment. This idea was carried out as a common initiative of the Polish Association for Logic and Theory of Science (PTL) and of the German based Society for Analytic Philosophy (GAP). The First German-Polish Workshop on Logic and Logical Philosophy was held in Bachotek/Poland from September 10.–13., 1995. It was organized by Kazimierz Świrydowicz (PTL), Heinrich Wansing (GAP) and Max Urchs (both).

This part of the present volume of Logic and Logical Philosophy is not the proceedings of the workshop. On one hand, not all the papers presented at the workshop (see previous page for the programme) are attended to this volume. Due to their more technical character, the contributions of Gregory Restall, Tomasz Skura, Heinrich Wansing, Andrzej Wroński and others will appear in the next number of Reports on Mathematical Logic. Some papers included in this issue were changed considerably for publication. On the other hand, colleagues who intended to join the workshop but had to cancel for some reason were invited to submit their material, too. We would like to thank the editors of both journals very kindly for their suggestion to publish the submitted material.

According to the aims of the workshop, we tried to keep it as informal as reasonable and reserved plenty of time for dialogue and spontaneous meetings. The truly beautiful Indian summer of '95 and the scenery of forest and lakes surrounding our Spartan camp made the right background for canoe rides, walks and campfire in the evenings. Altogether, it turned out to be a successful event from both social and scientific points of view. Here is a list of the participants of the workshop:

Timothy Childers (Prague),
Janusz Czelakowski (Opole),
André Fuhrmann (Konstanz),
Henning Hintze (Erlangen),

Paweł Idziak (Kraków),
Ida Jokisz (Białystok),
Tomasz Kowalski (Kraków),
Marcus Kracht (Berlin),
Karl-Heinz Krampitz (Berlin),
Martin Leiner (Mainz),
Jacek Malinowski (Warszawa),
Thomas Mormann (München),
Marek Nasieniewski (Toruń),
Ewa Orłowska (Warszawa),
Katarzyna Pałasińska (Kraków),
Jerzy Perzanowski (Toruń & Kraków),
Gregory Restall (Canberra),
Uwe Scheffler (Berlin),
Tomasz Skura (Wrocław),
Katarzyna Słomczyńska (Kraków),
Pirmin Steckeler-Weithofer (Leipzig),
Rainer Stuhlmann-Laeisz (Bonn),
Kazimierz Świrydowicz (Poznań),
Max Urchs (Toruń),
Heinrich Wansing (Leipzig),
Horst Wessel (Berlin),
Piotr Wojtylak (Katowice),
Jan Woleński (Kraków),
Andrzej Wroński (Kraków),
Klaus Wuttich (Berlin).

The editors would very much like to thank all of them and all the authors of this publication. Special thanks go to our co-organizer Kazimierz Świrydowicz. We gratefully acknowledge the financial support of the Deutscher Akademischer Austauschdienst, of Bank Handlowy Warszawa S.A., the Gesellschaft für Analytische Philosophie and the Nicholas Copernicus University Toruń. Last but not least we wish to express our appreciation to Kordian Wójciak, the administrator of the Bachotek holiday camp, and to his team for their assistance and kind hospitality.

*Max Urchs
Heinrich Wansing*
